

Litter waste report

ABU YOUNUS

Date: 12 May 2023

Introduction

A form of pollution resulting from improperly handled waste.

The Aims

To identify the impacts on the accumulation of litter, as well as the types of litter dropped, at each of the sites.

Importance of recycling

To save our environment. Reduces the amount of waste sent to landfills and incinerators. Conserves natural resources such as timber, water and minerals. Prevents pollution and reduces greenhouse gases by reducing the need to mine and process new raw materials.
