

# *Litter Waste*

Ahmad Sediqi

Litter waste is a survey to know how many percent of people recycle the litter, food, can, bottle or woods and our aims from report is to know litter waste is important for people to clean the environment.

We used MS Forms to ask people a few questions that how they recycle. We made a few questions by using MS Forms and we asked people to say do they recycle, or they do not. We collected responses.

Most people said that they like at least once in a week probably they recycle every week.
