MANASK HAMOUDA

little waste

Illustrates the importance of this report and compares the number of people recycling with those who do not. To find out who it is The majority of people cooperate in protecting and preserving the environment.

LITTLE MISS WASTE LESS

**We should
protect our
planet from
waste.**

BRADFORD

The city of Bradford is one of Britain's oldest cities and has many old buildings. Unfortunately, the city ranks as one of England's dirtiest cities, which tarnishes its reputation among tourists and even residents of the city.

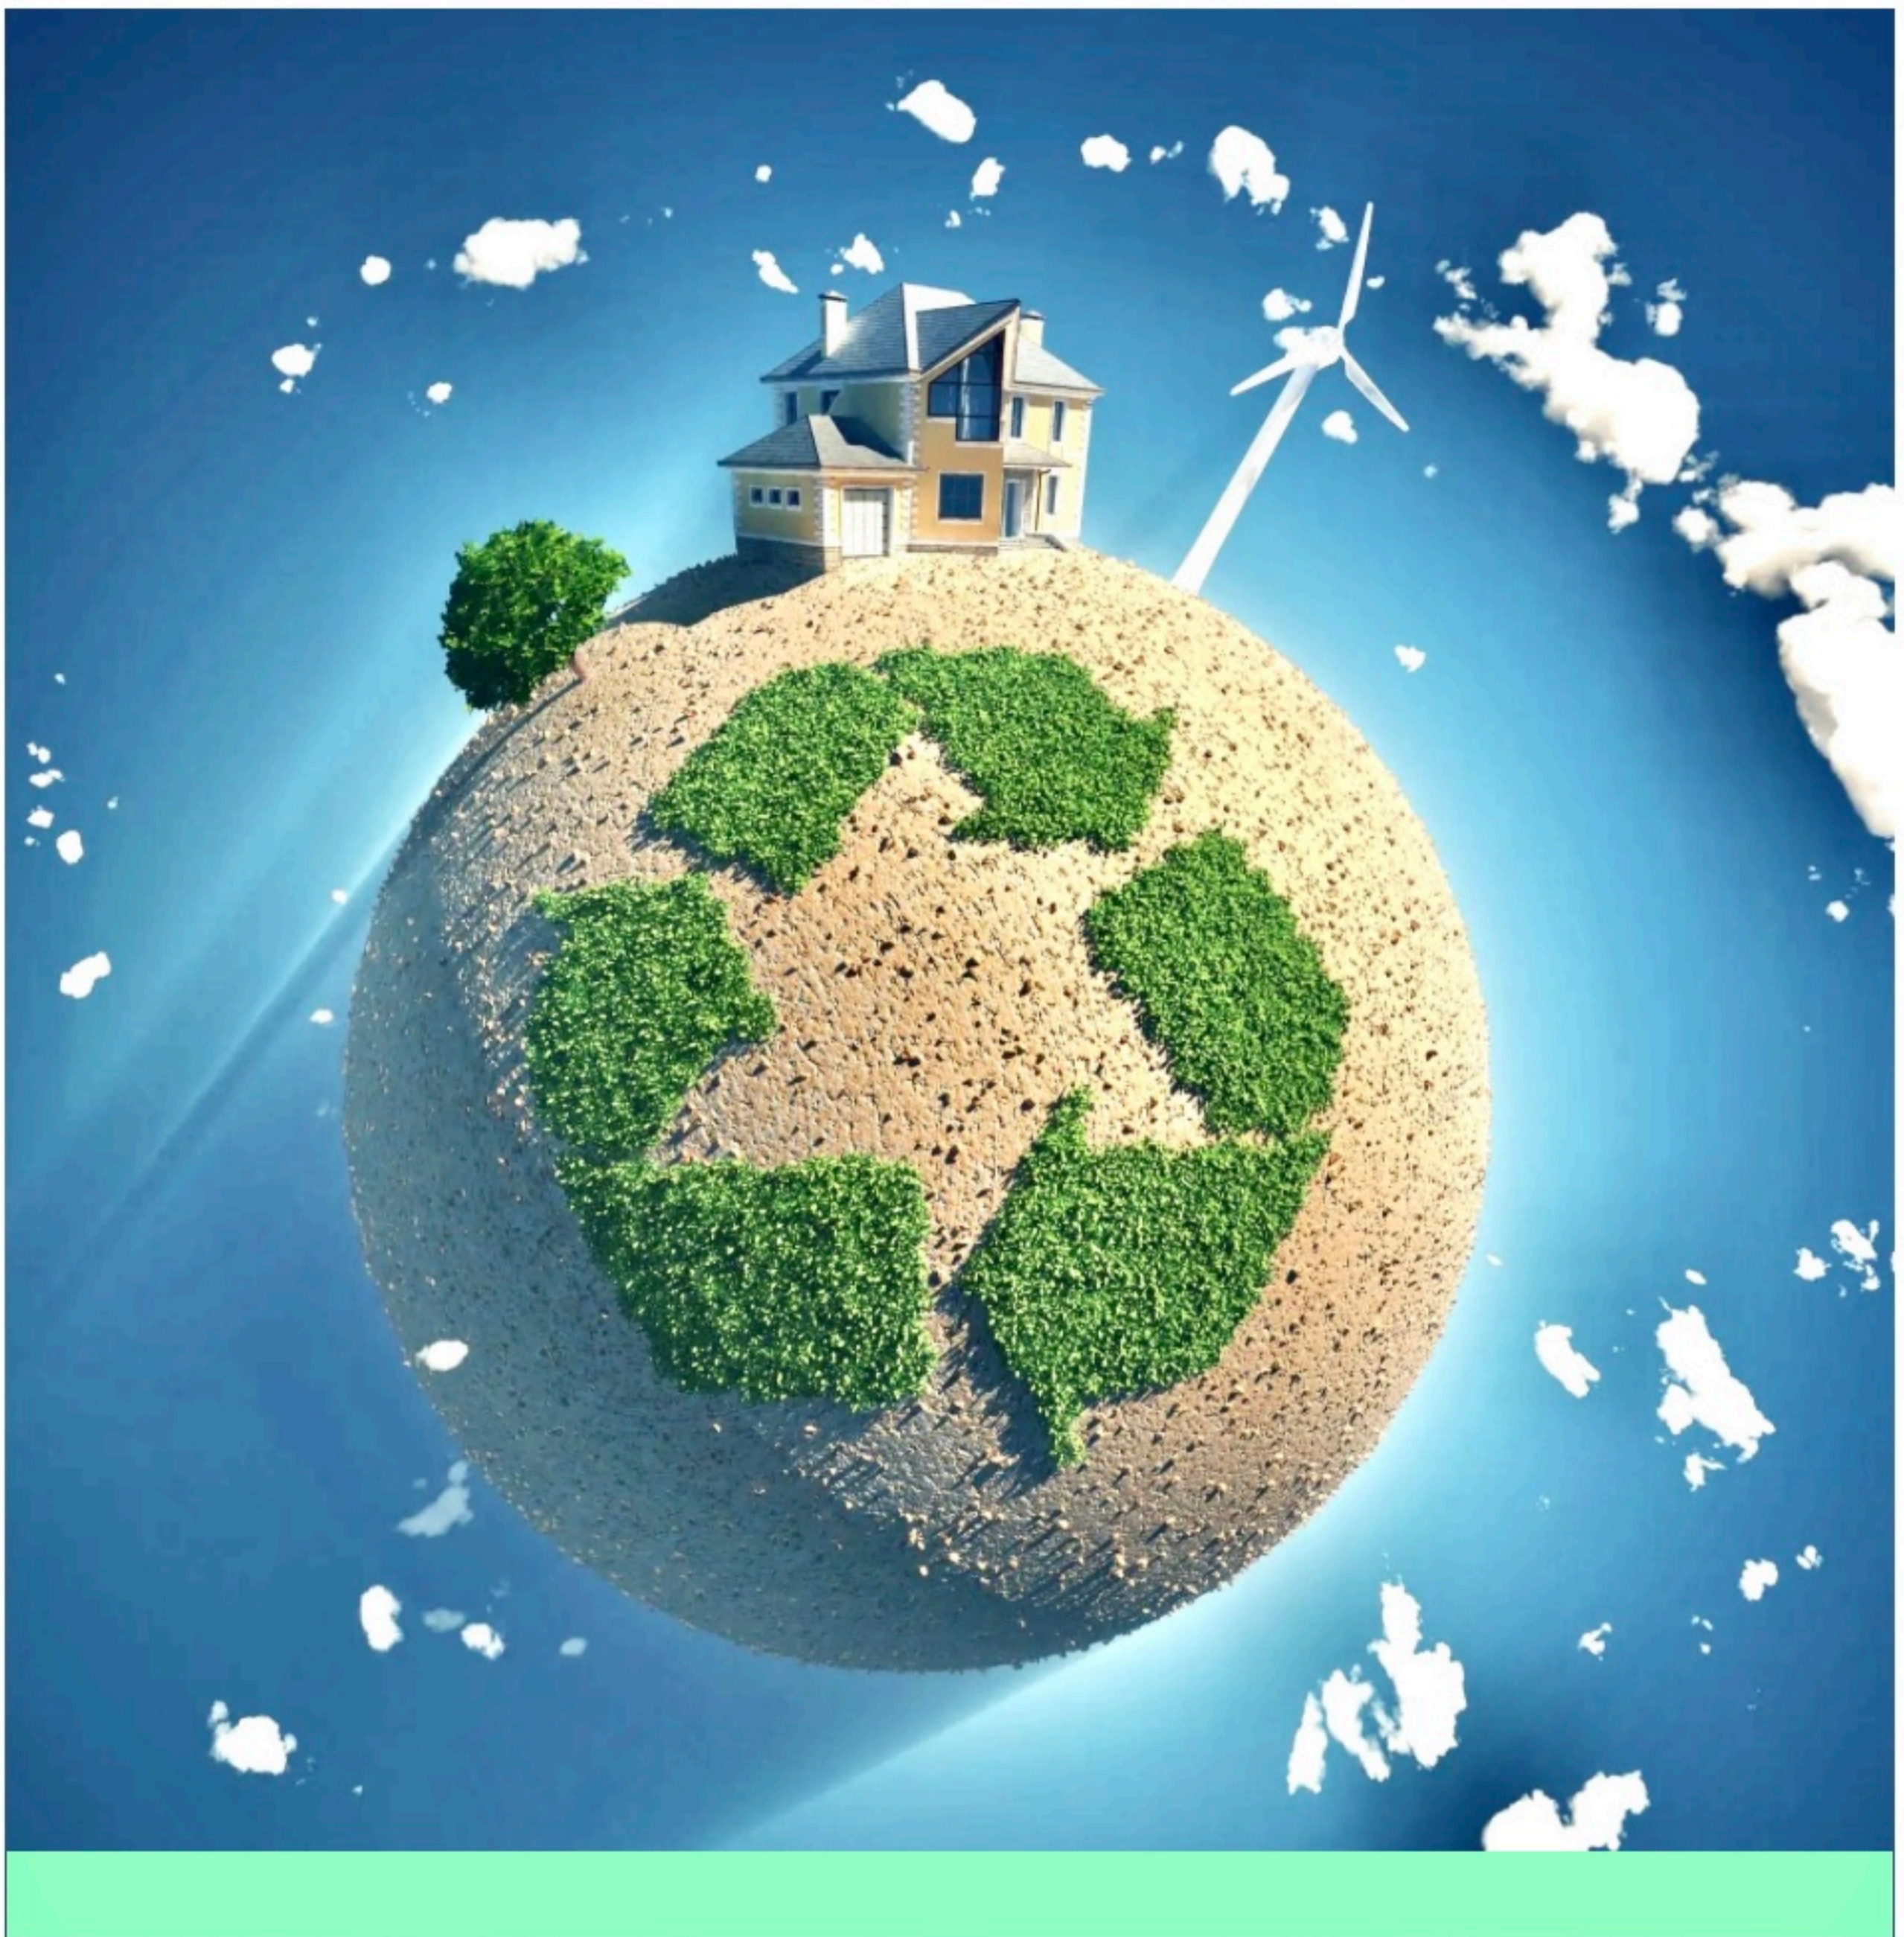

This questionnaire aims to identify the percentage of people who recycle waste, food, cans, bottles or wood. With this report, we want to know how important waste is in environmental reform.

IS RECYCLING IMPORTANT AND DO PEOPLE DO IT?

- We used MS Forms to ask people some questions about recycling methods, whether they recycle or not, with some saying they do it daily or even twice a week. This positive response shows that people are interested in recycling and preserving the environment.

RECYCLE YOUR WASTE

Recycling must become the main route for waste management, and every city, town and country must promote recycling, and in this way we will protect the environment .
