

Litter Waste

BY Maxim Carp

Introduction

The aims of this report are to reduce litter waste through Bradford and make together our city cleaner and safer. Our class made a survey by using MS Forms and we ask students/staff at Bradford College what they think about recycling litter. We also asked people outside the Bradford College territory to get more results. It is based on a survey of 40+ students.

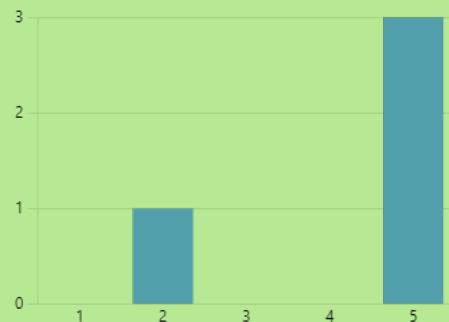

Which items can you recycle?

The majority of the people surveyed that the best recycled item is plastic and paper, through this pie chart we found out that 50% of people agree that the most recycled thing is plastic, and 38% of people choose paper and only 13% chose garden waste.

What do you think about recycling litter?

We asked students and people outside Bradford College what they think about recycling litter around our city and we got an amazing result namely 4.25 out of 5 are positive about recycling litter.

Recycle your waste

Recycling must become the main route for waste management. Cities and countries must promote about recycling properly only this way we can save our environment.
