Litter waste report

9:00 p.m. – by Muntder Al-Robaie

Introduction

The aim of this report is to highlight the importance of recycling and to compare the number of people who recycle and those who do not, to see who is the majority of people who help in recycling and preserving the environment

The city of Bradford

The city of Bradford is one of the oldest cities in the United Kingdom and includes many ancient historical places. Unfortunately, this city was classified as one of the most dirty cities in England, which reduces its reputation for tourists or even residents of this city.

We want to have a positive impact on the planet

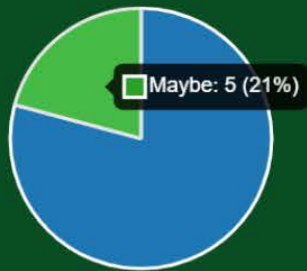

What to recycle ?

Materials made of plastic are among the things that are usually recycled, and also the boxes that are written on them are recyclable. Fortunately, most people have knowledge of how to recycle, through the survey that I conducted, and through it, 93% of the city's population appears to have knowledge of any materials that are recycled.

Is recycling important and do people do it?

We asked the residents of Bradford whether they recycle or not, and it turned out that 79% of them recycle, and this is considered good news that the city will become more beautiful and beautiful in the future, and people begin to understand the importance of recycling, but on the other hand, there are 21% of the population who said (Maybe) This indicates insufficient knowledge of recycling

Reduce your waste

Reduce your waste

Post this report or any information about recycling, helping the environment and reducing litter to maintain a beautiful city

Thanks

for helping environment
