

LET'S SAVE OUR PLANET

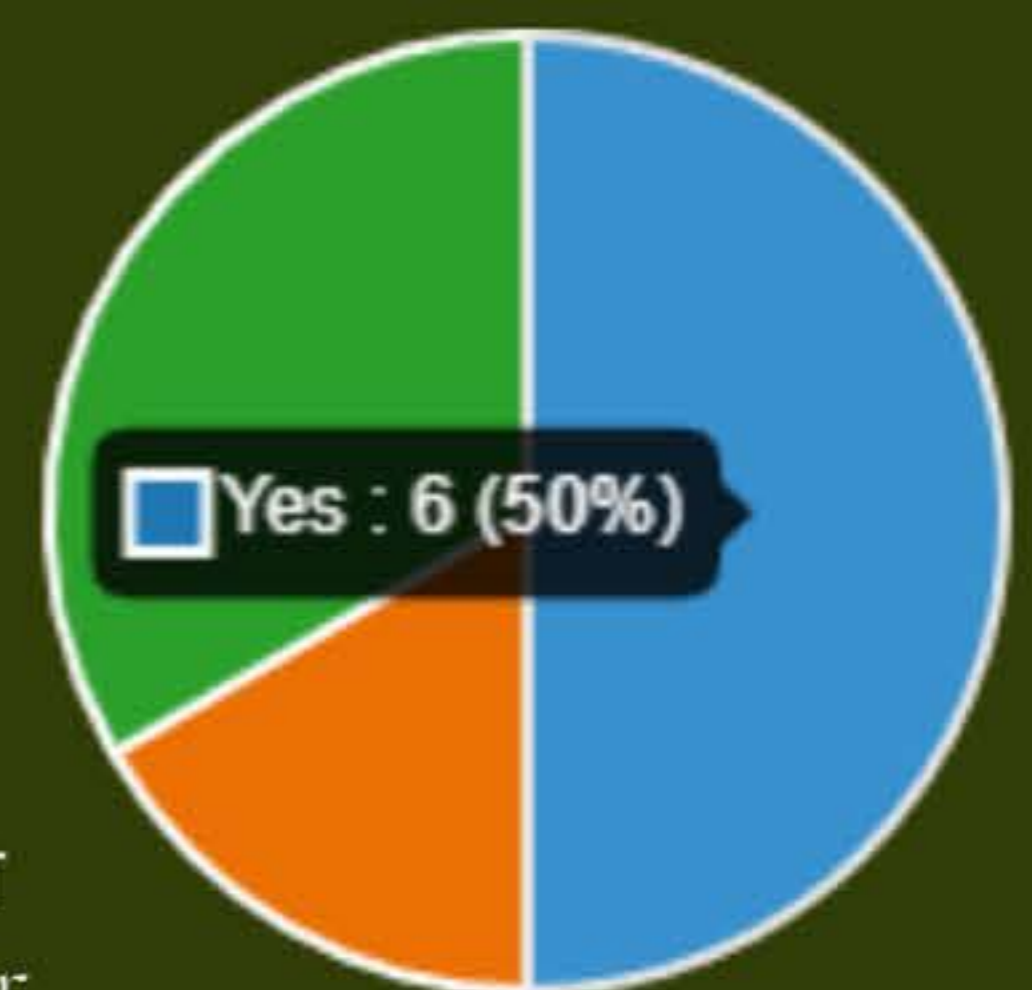

WALKING AROUND BRADFORD EVERYDAY I SEE LOTS OF PEOPLE LITTERING AND NOT CARING ABOUT THE PLACE WE CALL HOME; THE PROBLEM IN MY CITY IS THE RECYCLING..I START TO THINK OF SOLUTION AND I MADE A QUESTINARE. I ASK 12 ESOL STUDENTS FROM BRADFORD COLLEGE AND THIS IS WHAT I FOUND OUT...

My first question for them was "What is the point of recycling waste" 11 students said that recycling help us to save the planet, animals, plants and our health ,they know that the Earth its a important place. Just 1 student said that recycling waste we saving money , its a good point as well but more important its to save what we love the most.

Next question for students was how they feel while they recycle ,they answer , their answers make me have a chance to change something , 10 students said that they feel happy when they recycle and 2 students are optimistic. In our college we have responsible students that really cares about recycling.

In conclusion I started to be more worried about the future,health and safety tha is in danger because all the waste that we and we don't recycle i a big problem.

In the next question 6 students said that they are recycling every day, 2 of them don't recycle every day and 4 students said maybe they do or maybe they don't..

I come with a proposal for all the people from Bradford or any other city , please let's do for Earth a favor ,try to keep it clean and let's take care about everything that we love!!

You can be the change that the world needs!!
